King Corner Culvert Study & Analysis
Culvert Replacement Field Data Collection Project
(updated on 12/4/2020)

“The Town of Hawley is requesting bids for technical services for a culvert replacement project on Route 8A over King Brook (further described under section III, Scope of Services). This project is funded through a grant from the Massachusetts Department of Ecological Restoration.

This Bid Request presents a general proposed sequence of work with an expectation that responding firms will express their own project approaches. Bidders will be evaluated based upon their demonstrated experience with scientific river assessments; data collection and engineering culvert replacements that meet the MA River and Stream Crossing Standards. Additional considerations will be based on project examples, technical and management approach to this project, timeline for completed work, and cost effectiveness. The project is to be completed by June 1, 2021.”

BID OPENING RESULTS on 11.25.20

Bids were opened and publicly read at the Selectboard meeting at 7:00 pm on November 24, 2020. Bids received ~~and awards~~ are as indicated below.

BIDS RECEIVED:
